

TABLE OF CONTENTS

	<u>Page</u>
1. Introduction and Aggregate Results	1-1
1.1 Overview of Non-CO ₂ Greenhouse Gas Emissions	1-1
1.2 Emission Sources.....	1-2
1.3 Approach.....	1-2
1.4 Summary Estimates	1-3
1.5 Limitations	1-5
1.6 Organization of This Report.....	1-6
2. Methane	2-1
2.1 Overview	2-1
2.2 Natural Gas and Oil Systems.....	2-2
2.3 Livestock Enteric Fermentation	2-3
2.4 Landfilling of Solid Waste	2-4
2.5 Coal Mining Activities.....	2-5
2.6 Livestock Manure Management.....	2-6
2.7 Wastewater Treatment	2-7
2.8 Other Sources	2-8
2.9 Explanatory Notes	2-9
3. Nitrous Oxide.....	3-1
3.1 Overview	3-1
3.2 Agricultural Soils.....	3-2
3.3 Industrial Processes	3-3
3.4 Fossil Fuel Combustion	3-5
3.4.1 Stationary Combustion	3-5
3.4.2 Mobile Combustion.....	3-6
3.5 Manure Management	3-7
3.6 Explanatory Notes	3-7
4. High Global Warming Potential Gases	4-1
4.1 Overview	4-1
4.2 Substitutes for Ozone Depleting Substances.....	4-3
4.3 Semiconductor Manufacturing	4-4

TABLE OF CONTENTS

	<u>Page</u>
4.4 HCFC-22 Production	4-5
4.5 Electric Utilities.....	4-6
4.6 Magnesium Production	4-6
4.7 Aluminum Production.....	4-7
5. Methodologies Used to Compile and Estimate Emissions.....	5-1
5.1 Estimation and Projection Approaches	5-1
5.1.1 Methane and Nitrous Oxide Emissions	5-1
5.1.2 High Global Warming Potential (High GWP) Gas Emissions	5-2
5.2 Adjustments to Methane Estimates	5-2
5.2.1 Landfilling of Solid Waste	5-3
5.2.2 Coal Mining Activities	5-3
5.2.3 Natural Gas and Oil Systems	5-4
5.2.4 Livestock Manure Management and Enteric Fermentation	5-4
5.2.5 Wastewater Treatment.....	5-4
5.2.6 Other Agriculture Sources.....	5-5
5.2.7 Other Non-Agricultural Sources	5-5
5.3 Methodology and Adjustments to Approaches Used for Nitrous Oxide	5-5
5.3.1 Nitrous Oxide Emissions from Agricultural Soils	5-5
5.3.2 Nitrous Oxide Emissions from Industrial Processes.....	5-5
5.3.3 Nitrous Oxide Emissions from Stationary Fossil Fuel Combustion	5-6
5.3.4 Nitrous Oxides Emissions from Mobile Fossil Fuel Combustion	5-7
5.3.5 Nitrous Oxide Emissions from Manure Management.....	5-7
5.4 Estimation and Projection Approaches Used for High Global Warming Potential Gases	5-8
5.4.1 HFC and PFC Emissions from the Use of Substitutes for ODS Substances.....	5-8
5.4.2 HFC-23 Emissions as a Byproduct of HCFC-22 Production	5-11
5.4.3 Perfluorocarbon (PFC) Emissions from Primary Aluminum Production ...	5-12
5.4.4 Sulfur Hexafluoride (SF ₆) Emissions from Magnesium Production	5-14
5.4.5 Sulfur Hexafluoride (SF ₆) Emissions from Electric Utilities	5-15
5.4.6 Emissions from Semiconductor Production	5-15
5.5 Explanatory Notes.....	5-16

APPENDICES

Appendix A: Summary of Total Emissions Estimates and Projections for Non-CO₂ Gases

Appendix B: Methane Emissions for Years 1990-2010 for Developed Countries

Appendix C: Nitrous Oxide Emissions for Years 1990-2010 for Developed Countries

Appendix D: High GWP Gas Emissions for Years 1990-2010 for Developed Countries

Appendix E: Methane Emissions: Data Sources and Methods

Appendix F: Nitrous Oxide Emissions: Data Sources and Methods

Appendix G: Methodology and Adjustments to Approaches Used to Estimate Nitrous Oxide Emissions from Agricultural Soils

Appendix H: Methodology and Adjustments to Approaches Used to Estimate Nitrous Oxide Emissions from Mobile Sources

Appendix I: U.S. EPA Vintaging Model Framework
